EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Fairbairn on 8/2/2006.

In line 1 of claim 10,

"post" has been deleted.

In line 3 of claim 13,

"an" has been replaced by --a--.

The above changes were made to correct minor informalities.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior arts of Amplatz et al. (U.S. 5,944,738), Huebsch et al. (U.S. 5,853,422), and Erlebacher et al. (U.S. 5,350,399) do not disclose or provide the motivation for an occlusion device with arms that extend from one end of the center post and connect to a sheet located at the opposite end of the post. The prior art only discloses arms that connect to sheets located on the same end of the center post from which the arms extend and the addition of such structure would not be obvious, as it would destroy the method of functioning of the devices as disclosed by the prior art. Although the structure of arms or struts that emanate from one side of a center post and extend toward the opposite side of a center post has been disclosed in a vein filter such as that disclosed by Smith (U.S. 5,601,595), there is no motivation to add a sheet to the free ends of the arms or struts as this would destroy the collapsibility feature of the vein filter of Smith.

Art Unit: 3731

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
